Nature is not just a place we visit occasionally; it's a way of life that surrounds us every day. From the chirping of birds in the morning to the rustling of leaves at dusk, nature has a way of making us feel alive. And what better way to bring that feeling into the outdoor spaces of our homes than with LAMARs beautiful porcelain paving?

Our Paving is not just a design statement but a connection to the natural world we all crave. They offer a seamless blend of function and style, allowing us to enjoy the beauty of nature in our back gardens. Whether you are looking for a peaceful oasis to unwind after a long day or a vibrant space to entertain friends and family. Our range has got you covered.

THE ULTIMATE COLLECTION

Pave the path for outdoor excellence with LAMAR

LAMAR, a distinguished brand celebrated for its exquisite largeformat porcelain slabs, boasts a formidable reputation in Turkey and Vietnam. Garnering unparalleled success with over 1500 containers annually dispatched to Turkey and over 1000 to Vietnam, LAMAR has established a robust presence across multiple nations.

Additionally, renowned for its LAMAR's Terra Sahara & Terra Gris sandstone and external porcelain paving, LAMAR epitomizes quality, versality and innovation in the industry. With a profound affection for the United Kingdom, both personally and professionally, we are excited to expand our reach in the UK market, aiming to introduce our exceptional products to a wider audience.

LAMAR offers a selection of External Porcelain Paving which include the 1000x500mm and 900x600mm range at highly competitive prices. This paving is highly sought-after for enhancing outdoor living spaces like patios, pool decks, walkways etc. These pavings offer a seamless blend of aesthetic appeal and durability, making them an ideal choice for homeowners looking to elevate the style and functionality of their outdoor living areas.

boasts of a full bodied composition, providing consistent color throughout the material. Our Porcelain Paving is bred at 1200C to ensure incomparable mechanical characteristics. This modern alternative is ideal for contemporary landscaping due to its resistance to staining, ageing, and fading. With a consistent, smooth R11 Anti-Slip Surface, it's rated highly for slip resistance, making it one of the highest quality pavers available.

PAVINGS

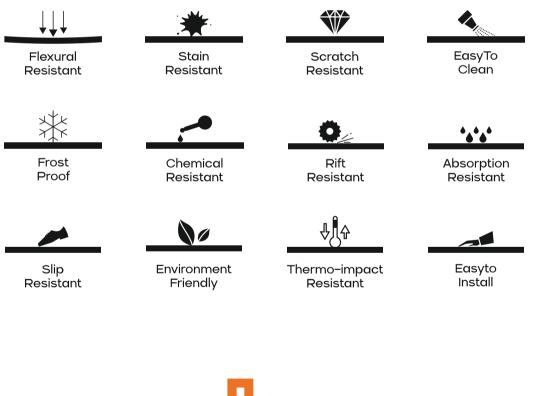

ETHICAL SOURCING

UNCOMPROMISING QUALITY

Our high-quality porcelain paving is treated to endure harsh outdoor elements like temperature extremes, moisture, and UV radiation. A mixture of natural clays and minerals is dry- pressed or dry-milled, shaped with a hydraulic press, and bred at high temperatures to create a hard, dense, and durable tile. The pavers can be glazed or unglazed and are inspected for quality before shipping. External Porcelain Paving is a popular choice for enhancing outdoor living spaces due its strength, resistance to moisture and frost, and low maintenance requirements.

Safer, Durable & Reliable

The slip resistance of External Porcelain Paving is rated using the R-11 quality standard. This rating is determined through a laboratory test measuring the force needed to cause slipping on the tile surface. An R-11 rating indicates high slip resistance, reducing the risk of slips or falls in wet or oily conditions. This is especially important for outdoor spaces where moisture and debris can create hazardous conditions. External Porcelain Paving with an R-11 rating provide a safe and durable surface that can withstand harsh weather. The R-11 rating is crucial for anyone prioritizing safety when installing External Porcelain Paving.

Let your imagination take charge and explore the numerous creative ways to install outdoor tiles that will elevate your outdoor space to a sophisticated level.

Application

Terraces, pathways, and balconies adorned with 20mm External Porcelain seamlessly merge with the surrounding spaces, creating a natural and cohesive ambiance. Internal flooring extends seamlessly into external surfaces, establishing a fluid transition between indoor and outdoor spaces. In urban areas such as public parks, gardens, and surrounding area of the swimming pools, the incorporation of 20mm outdoor porcelain unexpectedly transforms these spaces into charming and picturesque locations.

The products featured in this catalogues are primarily suggested for external spaces that require floorings with anti-skid properties.
